# AGUR NEW HEADQUARTERS

AGUR 신사옥

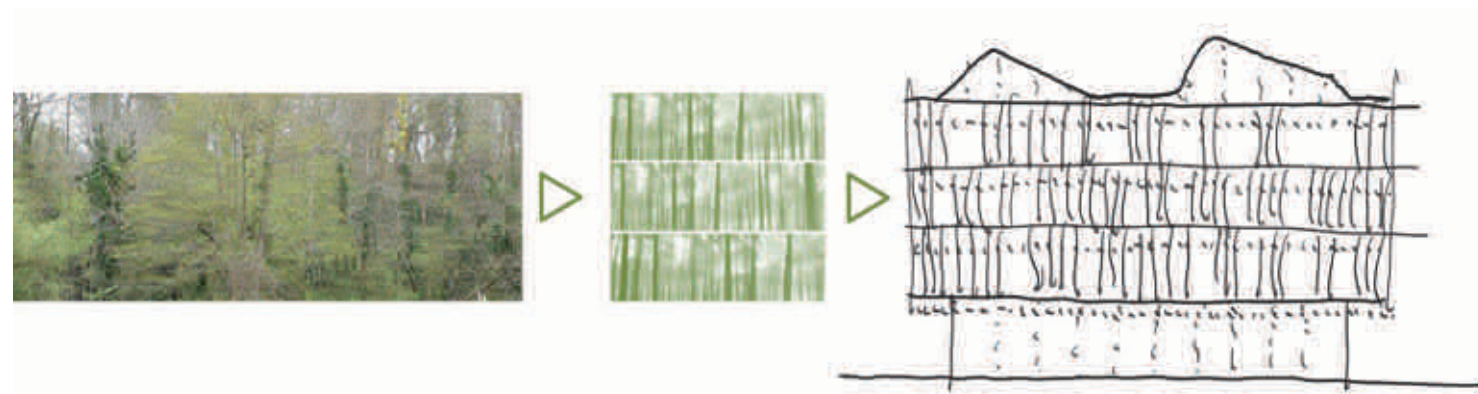

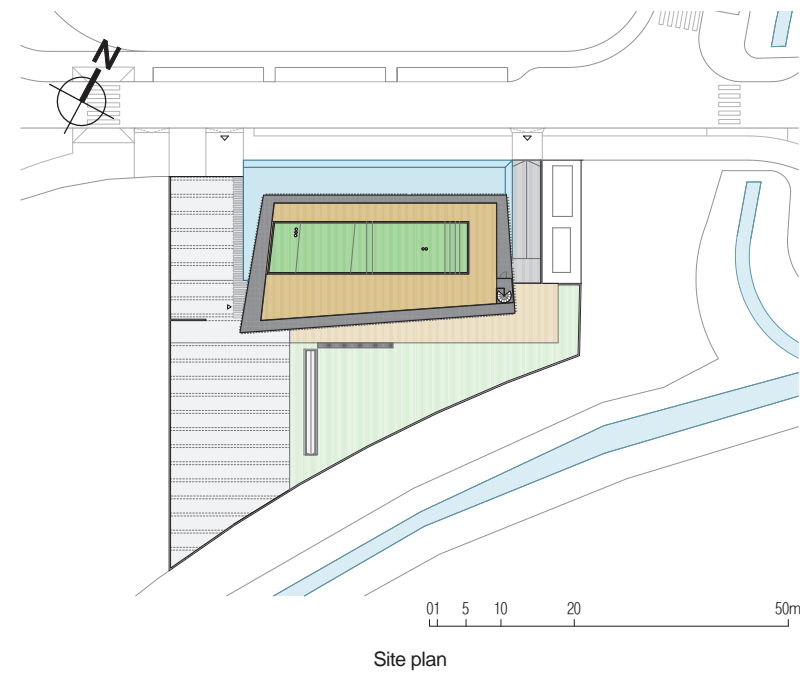

IDOM / Federico Pardos

IDOM / 페데리코 파르도스

**Location** Anglet, France  
**Function** Office facility  
**Total floor area** 2,403m<sup>2</sup>  
**Stories** B1, 5FL  
**Photographer** Maite-Pharisier

**위치** 프랑스 앙글레  
**용도** 업무시설  
**연면적** 2,403㎡  
**규모** 지하층, 지상5층  
**사진** 마이테-파리시에

Design concept

**A window onto the forest**

The new headquarter building of AGUR, a water distribution company, is located in the ZAC Melville Lynch area of Anglet, France. The setting is exceptional: a wild forest extends over a large hill, at the foot of which is a stream that adds to the beauty of the landscape.

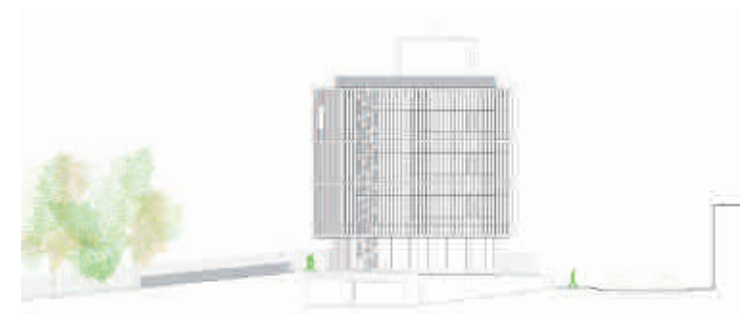

Preserving this natural environment is our main concern; the skin of the building is designed so that nature seeps into the interior to be contemplated by the user. The furniture merges with the large windows and the forest becomes omnipresent through the wood of the roof in continuity with the eaves. This strategy makes the window disappear into the landscape. The facade is wrapped with a second permeable skin of vertical slats, simulating the tones of the bark of the trees, to mitigate solar incidence and reduce energy consumption.

The work areas are organized around a central core, clad in wooden shingles, like a large tree, which houses the vertical circulation areas and services, to preserve the panoramic views of nature.

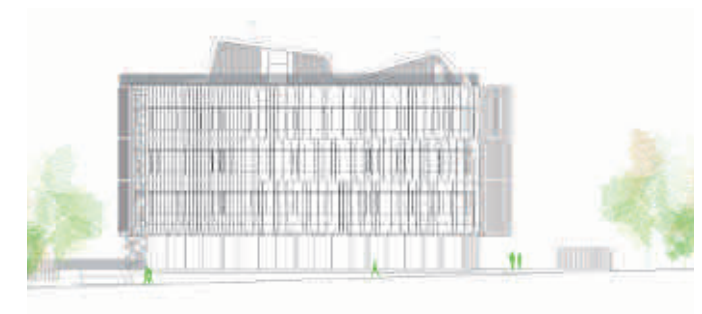

The 2,400m<sup>2</sup> building is divided into three volumes and four levels: a transparent base, a three-story workspace building, and an accessible terrace. At the center of the building is a central volume that houses and conceals the mechanical rooms, staircase, lift and restrooms.

The new headquarter building is energy efficient, using passive strategies while being environmentally friendly. Water, the very essence of the activity of AGUR, is reused by collecting rainwater to supply the toilets, the indoor fountain and the irrigation system.

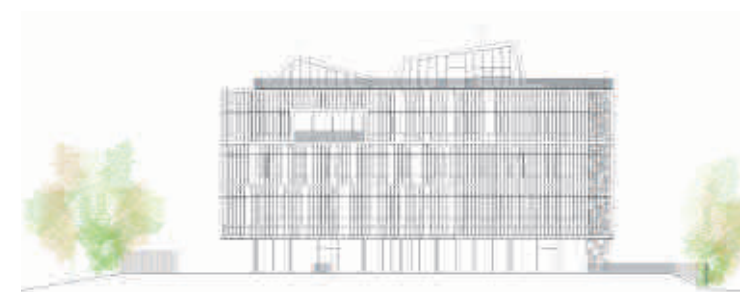

Water, nature and light in perfect symbiosis for the well-being of users.

**숲을 바라보는 창**

AGUR 배수회사의 새로운 본사 건물은 프랑스 앙글레의 ZAC 멜빌 린치 지역에 위치해 있다. 큰 언덕 위에 야생 숲이 펼쳐져 있고 아래에는 개울이 흐르고 있어 멋진 경관을 자랑한다.

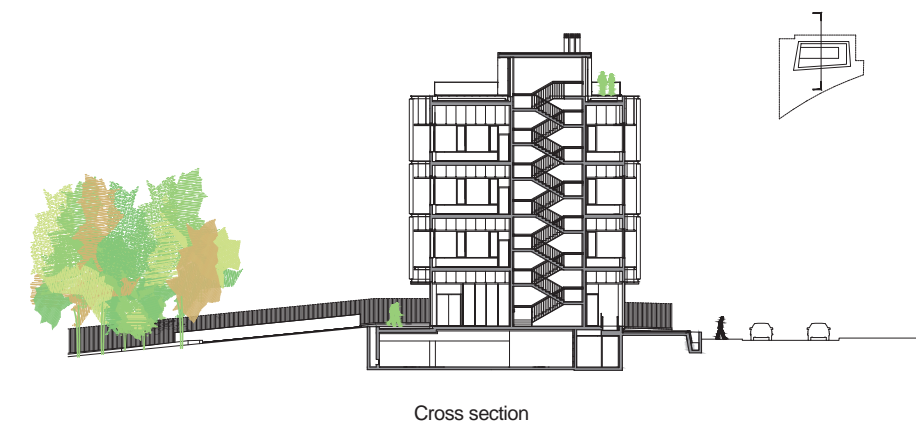

이 자연 환경을 보존하는 것이 핵심이며, 건물의 외피는 자연이 실내로 스며들어 사용자가 사색할 수 있도록 설계되었다. 가구는 큰 창문과 합쳐지고, 숲은 처마와 연속된 지붕의 나무를 통해 어디에나 존재한다. 이 전략을 통해 창문이 풍경 속으로 사라진다. 파사드는 나무 껍질의 톤을 모방한 수직 슬랫의 두 번째 투과성 외피로 감싸져 있어 태양열 발생을 완화하고 에너지 소비를 줄인다.

업무 공간은 자연의 탁 트인 전망을 유지하기 위해 수직 동선 공간과 서비스를 수용하는 큰 나무와 같은 목재 지붕널로 덮인 중앙 코어를 중심으로 구성된다.

2,400㎡의 건물은 투명한 기단부, 3층 규모의 업무 공간 건물, 접근 가능한 테라스라는 3개의 볼륨과 4개의 레벨로 나뉜다. 건물 중앙에는 기계실, 계단, 엘리베이터, 화장실이 있는 중앙 볼륨이 있다.

새로운 본사 건물은 친환경적이면서도 패시브 전략을 통해 에너지 효율성이 높다. AGUR 활동의 핵심인 물은 빗물을 모아 화장실, 실내 분수대, 관개 시스템에 공급함으로써 재사용된다.

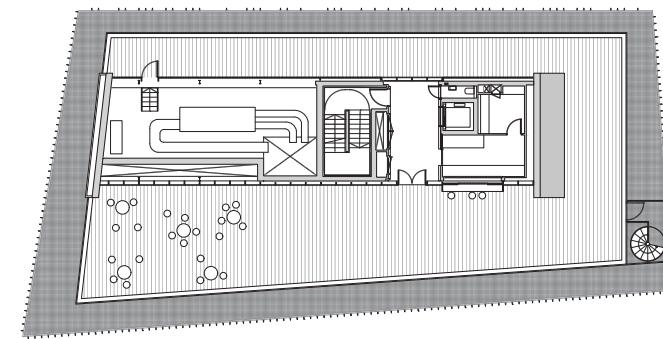

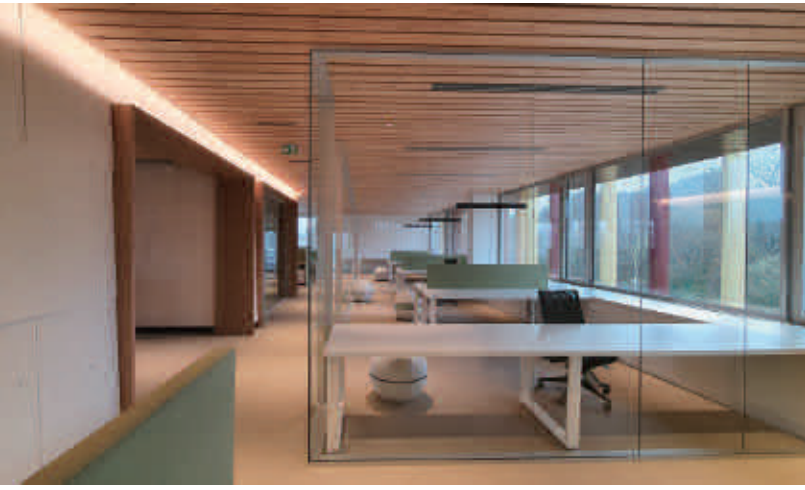

사용자의 웰빙을 위해 물, 자연, 빛이 완벽하게 공생한다.
